NOVEMBER MEETING
JOIN THE BEEHIVE CHAPTER ICC FOR A DISCUSSION;

COLD WEATHER APPLICATIONS OF STUCCO
PRESENTED BY PAUL JAHN

NOVEMBER 15, 2017
12:00 PM
OREM CITY PUBLIC SAFETY TRAINING ROOM
56 North Main Street, Orem, UT

NOTE THE NEW LOCATION
As the end of this year is approaching, we are beginning to focus on the important things in life like turkey dinners and Christmas ham, but before we get too distracted I would like to touch on a few topics.

First, the weather outside is growing cold and we all need to review our codes, instructions, and techniques for cold weather application products, ranging from concrete, to stucco, to drywall. If you attend November’s chapter meeting we will be covering cold weather application of stucco.

Second, we need to remember to keep up on our licenses and memberships. The Beehive Chapter has served us all well in the past and it is only here now due to the loyal membership we all renew every year. We would like to challenge each of you to invite a neighboring department that we have been missing in years past to come and attend the meetings.

The third and final topic I would like to touch on is the need for participants in the Beehive Chapter Board. We have has some phenomenal board members and I have seen first-hand how much each of these individuals care about the profession and the people in it. I would like to invite you to nominate someone that you think may help us maintain a chapter that we can be proud of. We love seeing someone new embrace the spirit of the chapter and help us provide quality education for our members.
IT'S THAT TIME OF YEAR!
2018 MEMBERSHIP FEES ARE DUE
ON JANUARY 1, 2018

RENEW ONLINE

CONTINUE GAINING THE GREAT BENEFITS OF BEING A BEEHIVE CHAPTER MEMBER:

- NETWORK OF REGIONAL BUILDING OFFICIALS AND CONSTRUCTION PROFESSIONALS
- MONTHLY NEWSLETTER
- MONTHLY MEETINGS WITH IN-DEPTH DISCUSSIONS AND TRAINING (FOOD PROVIDED)
- AND MUCH MORE!
BEEHIVE CHAPTER
ANNUAL BUSINESS MEETING

Wednesday, December 13th
12:00 PM to 1:30 PM

Cabela’s
2502 Cabela's Blvd
Lehi, Utah

Lunch is provided
We recently began calling for nail plates to extend 2 inches above sole plates and below top plates. This is required for plumbing lines and the dryer ducts. This provides additional protection from drywallers accidentally penetrating one of these items. It also helps protect these systems when installing baseboard and crown molding.

A contractor told me a story about a drywall screw that had penetrated into a water line. It wasn’t until three years later that they found out about it. The screw had finally rusted enough for it come out and created a large amount of water damage in the home. There are likely stories on dryer vents where screws have penetrated into lines creating lint buildup and eventual fires.

I have heard from several plumbers that there is a handful of jurisdictions that call this. Do you have any personal experiences or stories where not having plates has created some problem? Let us know your thoughts on this.
Contact Patricia Abdullah [beehiveicc@gmail.com] with Beehive Chapter if you would like any additional information on trainings offered on the calendar.
